- Actively participated in live projects, collaborating effectively with the team.
- Utilized Git for version control and collaborative development.
- Assisted in debugging and resolving complex issues in both frontend and backend codebases.
- Implemented responsive design practices to ensure cross-device compatibility.

PROJECTS

Library Management CRM System | March 2025 – May 2025 | [\[Link\]](#)

Designed and developed a comprehensive Library Management CRM with full admin control. Features include book purchasing, allotment, return, and removal, along with student and vendor management. Integrated functionalities for date-wise daily reports, fine calculation, and invoice generation. The admin dashboard enables efficient control over library inventory and user activity.

Cab Service Website | June 2024 – July 2024 | [\[Link\]](#)

Built a responsive web platform using HTML, CSS, and JavaScript that allows users to explore travel options and book cabs online. The site offers detailed cab listings, real-time contact features, and a user-friendly interface to enhance the overall booking experience.

Bulk Email & SMS Sender | August 2023 – September 2023 | [\[Link\]](#)

Developed a tool using HTML, CSS, JavaScript, Python, and Django to send bulk emails and SMS messages. The system processes Excel files containing contact information, streamlining mass communication for businesses or campaigns.

Gym Management Website | April 2024 – May 2024 | [\[Link\]](#)

Created a full-featured gym website using HTML, CSS, JavaScript, Python, Django, and SQL. Users can register, view and purchase gym plans, select personal trainers, and track attendance. The platform simplifies gym management and enhances the user experience through a clean interface and backend integration.
